PARIS - CANNES - ST-TROPEZ
Air Conditioning and Treatment Solutions
Design - Installation - Maintenance

CLIM DENFERT Bourquin, a family history and recognized expertise

Is an independent family business specialising in air treatment and reversible air conditioning. The company was founded in 1967 by Claude Bourquin, a refrigeration technician and a pioneer in this emerging market, particularly catering for businesses and private individuals. When he retired in 1999, the torch was passed on to Stéphanie and Gilles Bourquin, who manage the company today. Under their leadership, the company has stuck to its core values while adapting to new market trends, and after years of continuous growth, Clim Denfert is now a key player in the industry.

Since 1967, air has been our raw material.

Always conscious of the latest technological advances and regulations, particularly regarding energy efficiency and respect for the environment, we have adapted our facilities, range of services and qualifications to meet the demands of the market, our customers and our partners.

Our Customers:

Our customers are always at the heart of everything we do.

We design and deliver high-quality air conditioning installations using cutting-edge technology that not only delivers the desired comfort (such as efficient performance and low noise levels) but also meets expectations with regard to aesthetics and functional integration, just like any other professional or home automation system.

Our Partners:

A significant part of our business and development naturally stems from the close collaboration between our technical design office and our partners—architects, designers, interior decorators and fit-out specialists. For top-of-the-range installations, this collaboration helps us find optimal solutions for aesthetic and acoustic integration. We are certified for installation, commissioning and repairs (including warranty repairs) by most manufacturers.

Our Commercial and Technical Advantages:

Located in Paris, Cannes and St-Tropez, CLIM DENFERT's showrooms boast a range of next-generation air conditioning systems and equipment from the top brands. Our consultants will guide you in your choices and support you in the implementation of all your projects. Our logistics resources ensure a close, personal service that is responsive and

efficient at all times. We are experienced in all types of interventions, regardless of the constraints, particularly in urban environments. We operate over 40 vehicles (including some 100% electric and hybrid rechargeable models) and have our own qualified technical teams (made up of 70 employees, including 30 installers and 20 technicians).

OUR KEY SECTORS OF OPERATION

Each year, **CLIM DENFERT** installs nearly **2,500** indoor units and **500** outdoor units, performs over 5,000 repairs and manages more than **2,000** maintenance contracts.

For over 50 years, we have specialised in reversible air conditioning and air treatment for the hospitality industry, restaurants, retailers, the liberal professions, office spaces (both administrative and technical) and residential installations (such as luxury homes, apartments and single-family homes).

Diverse environments, same level of expectation.

Support based on trust and precision.

CLIM DENFERT, A RESPONSIBLE COMPANY HELPING TO PROTECT THE ENVIRONMENT

- **Energy Efficiency:** Ongoing research into technical solutions that help reduce and control energy consumption by the systems we install.
- **System Longevity and Performance Optimization** through bespoke maintenance programmes.

- **Strict Regulatory Compliance**, especially regarding the reduction of greenhouse gases (such as the permanent ban on R22 refrigerant since 1 January 2015). We now install air conditioning units using R32, which is less harmful and just as energy-efficient, with no additional cost.
- **Our commitment as an eco-responsible company** goes even further. We are fully aware of the need to reduce energy dependence and improve air quality, particularly in urban environments. As a result, we have upgraded our fleet of technical and commercial vehicles with cleaner models (including some 100% electric and hybrid rechargeable vehicles).

- **Qualifications :** All of our employees are duly certified in accordance with applicable regulations for all the work they carry out as part of the services we offer. **CLIM DENFERT** has a decennial liability insurance policy to cover the ten-year guarantee of all its projects.
